See: www.pegasusaa.com or email Jan@pegasusaa.com or call John Korver at +31 641082521.

Are you Interested how your airport security is performing and want a peer review?

The airport security diagnostic is the perfect tool. **The diagnostic will include an examination of operational, planning, and facilitation aspects of your business** that will result in an actionable list of initiatives.

Improve security level, decrease your costs, improve your ASQ score and identify options to introduce new security technologies.

We will challenge you to think “out of the box”.

What is it that keeps you awake at night?

Do your shareholders press for better performance?

Some of the potential returns we found in airports are:

- Quicker passage through the security process, the more money will be spent at retail facilities with satisfied customers.
- Airport security is not only a cost element but also an airport image asset.
- Compliance with regulation results in happy passengers.
- Technology used to reduce costs and improve image.
- Higher ASQ scores.

OUR PROPOSAL

During a period of one week, 2 airport security professionals, each with over 25 years relevant experience, will visit your airport and undertake an independent diagnostic of airport security-compliance and efficiency.

We will then deliver a comprehensive report that will tell you what you need to know. The report may, optionally, be delivered to your Board.

You pay for the airfare, the hotel and our €25,000, we will deliver a positive outcome.
